ABOUT US

At CoolSlimming Aesthetics we believe that people shouldn't have to compromise to build their business, so we are dedicated to supplying the most advanced non-invasive TGA Approved medical aesthetic equipment with emphasis on superior quality, clinical safety and unmatched after-sale care.

Comprised of highly trained and dedicated professionals; we work together to design, develop and produce industry-leading equipment that we are confident in, for businesses we believe in.

We pride ourselves in outstanding processes, maintaining extremely high standards of training, marketing support and remarkable customer service. All this to ensure that our client's excel in today's ever-growing aesthetics industry.

Your success is our success; that's why at CoolSlimming we strive to deliver safe and results-driven solutions to a growing base of consumers across the globe.

Additionally, our devices are manufactured to the highest quality standards, complying with both medical and aesthetic CE and other international legal jurisdictions.

THE CONCEPT

Brand New

Technology

STRENGTHEN
YOUR BUSINESS
WITH MEDICHAIR

Weak pelvic floor muscles affect millions of people around the world and causes many unwanted side effects from lower back pain to most commonly urinary incontinence for both men and women.

MediChair uses state of the art High-Intensity Focused Electromagnetic technology that causes extreme muscle contractions to non-invasively and non-surgically strengthen the pelvic floor effectively and in turn addressing undesired symptoms of weak pelvic floor muscles.

In just 6 x 30-minute long sessions patients can take back control and bring back their confidence.

WHY CHOOSE MediChair?

MediChair utilises High intensity Electromagnetic Stimulation technology that stimulates the pelvic floor muscles to contract vigorously for several seconds.

With scientifically proven technology you can treat your patients with confidence and ease using the MediChair, in a non-invasive and quick procedure done over the course of 3 weeks.

PLATFORM BENEFITS

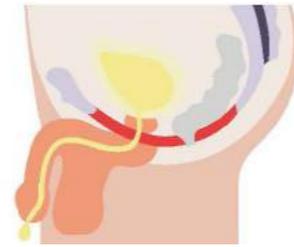

- High earning potential
- Easy to use
- Client remains fully clothed
- Non-invasive
- Painless
- Operator independent
- TGA approved treatment
- Zero downtime

MediChair uses the most innovative technology to help you achieve scientifically proven results. Utilising High-Intensity Focused Electromagnetic energy, the MediChair induces supra-maximal muscle contractions to effortlessly and efficiently strengthen the pelvic floor muscles.

Supra-maximal is a term which refers to high tension muscle contractions that surpass the highest amount of tension your muscles can exert and hold under regular maximal voluntary contractions. Supra-maximal contractions are not achieved by voluntary actions alone, such as kegels.

The motor neurons are stimulated throughout the 30 minutes treatment, causing the pelvic floor muscles to do over 20,000 muscle contractions, activating the entire pelvic floor muscles, and comprehensively improving muscle control ability.

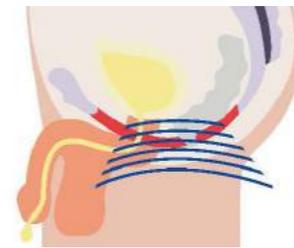

After 6 sessions with High Intensity Focused Electromagnetic therapy, patients developed the new motor pattern needed to better control pelvic floor muscles and regained muscle strength and continence control.

RESULTS

WHAT MEDICHAIR USERS ARE SAYING...

"I can now play with my kids and exercise all without being afraid I'm going to have an accident. MediChair has truly been an investment in my health and confidence."

"I was skeptical at first, but I am so happy I decided to give the MediChair a go. I've never had to cross my legs when I sneeze or laugh since!"

"Every time that my partner and I are intimate since I've had the treatment the pleasure and the satisfaction has increased! This machine is a life changer, it has totally given me more confidence."

"My core feels tighter, I've regained control of my bladder and as a bonus the pain I used to get on my lowerbackhasimproved massively."

You can't put a price on confidence, that's why I recommend this treatment to everyone I know."

TESTIMONIALS

WHAT OUR CUSTOMERS SAY...

“ I went up to try MediChair for myself as I was thinking of adding it to my clinic after hearing about it. I wouldn't ever sell something to my clients that I don't believe in myself and wow this chair is absolutely amazing. I decided there and then while I was there I needed to offer this treatment in my clinic. I knew it would do well as a lot of my clients are over 50s but I was also pleasantly surprised how many young mums have loved it as well. I'm so proud to offer it to my clients as everyone seems to be talking about it as they love it as it's the easiest treatment they ever had. I've treated around 40 clients now all with mixed forms of incontinence and everyone loves it and I'm so happy to see my clients relief and hear how it's changed their life so easily. Very happy and I've already recommended my friend to them to buy a machine also.

Very happy thanks guys. ”
